

Russell Investments World Equity Fund II

William Pearce
Portfolio Manager

Russell Investments' Global Equity Team comprises over 23 experienced professionals, including portfolio managers, researchers, portfolio analysts, and strategists in Russell Investments offices around the globe. The team manages a wide range of U.S., non-U.S developed, emerging market, frontier market, and global equity mandates.

Fund Objective

The Fund aims to achieve long term growth on your investment by investing at least 80% of its assets in the equities and investments similar to equities of companies worldwide. The Fund may invest up to 20% of its assets in emerging markets (developing countries). The Fund is actively managed with reference to the MSCI ACWI (USD) - Net Returns (the Index) which it seeks to outperform by 2% over the medium to long term. Russell Investments/ Money Managers have full discretion to select investments for the Fund. This product is an Article 8 product, as defined under EU regulation - it promotes environmental or social characteristics and invests in companies that follow good governance practices. This product does not have sustainable investment as its objective.

Fund Update

The Fund outperformed the benchmark return. Its value exposure was helpful in the period. At the sector level, stock selection within information technology was a key contributor. In particular, overweights to TSMC, Seagate Technology Holdings and Samsung Electronics were rewarded. Overweight exposure to materials was also effective (overweight Glencore, off-benchmark position in Celanese Corporation). In consumer discretionary, an underweight to Tesla was beneficial. Elsewhere, stock selection within health care was additive. However, underweights to energy and utilities detracted. Stock selection within industrials was also unhelpful, including underweights to Caterpillar and Mitsubishi.
