

## HSBC Corporate Money Funds Limited

# US Dollar Fund

Marketing communication | Monthly report 31 March 2025 | Share class R

### Investment objective

HSBC Corporate Money Fund aims to provide a high level of current income consistent with the preservation of capital and the maintenance of liquidity by investing in a diversified portfolio of money market instruments.

### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund's objective may not be achieved in adverse market conditions. During times of very low interest rates, the interest received by the Fund could be less than the costs of operating the Fund.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
